Comments

Zafferano - quality and artistic masterpiece in one. The company is particularly proud of the Esperienze line: hand-blown and with a special wave shape in the glass body. These ensure a completely new wine experience because the wine is supplied with significantly more oxygen when it is filled in than with conventional wine glasses. This then results in a noticeably more intense taste experience. Born in 2001 and managed by Federico de Majo, the glassware factory has stood for innovation and handmade quality from the very beginning. Federico de Mojo has dedicated his entire life to the fascination of glass. His journey began in the family business in Murano, where he was able to realize himself early on through his glass work.
