| Article no | 79021700 |

Comments

The secret recipe is the result of ancient knowledge about the art of herbs, a long search for the perfect balance of ingredients and a pinch of creativity. The distillation and combustion processes create the characteristic amber color. An unusual, multi-faceted craft product, a combination of power and smoothness, perfect for true gin lovers.

Tasting notes

Gin Monsieur is the first of the Del Professore Gins and pays homage to legendary bartender Jerry Thomas. He was the publisher of the first cocktail book "How to mix drinks". It is created through a blend of spices and herbs carefully selected to create a premium quality version of one of today's most popular spirits. Juniper, lavender, angelica, orange, rose, chamomile and other flavors blend with the premium spirit to create a unique product with vibrant floral and balsamic notes.
