

## Japanese Gin

Cambridge Distillery

Type	Gin
Origin	Gin, Japan
Producer	Cambridge Distillery Cambridge
Contents	70 cl
Serving temperature	5 -10° C
Alcohol content	42 %
Article no	79401700

## Comments

The world's first gin that focuses exclusively on Japanese botanicals. Our Master Distiller was delighted with these exciting and unusual flavors, only accessible through Cambridge Distillery's low-temperature distillation processes. It is made from six botanicals: juniper, shiso leaf, sesame, cucumber, sansho and yuzu: each is individually vacuum distilled and then blended together for exceptional purity of flavor.

## Tasting notes

Fresh green aromas (shiso) and juniper aromas. Peppery, spicy and yuzu citrus notes.
