Cambridge Distillery

Type	Gin
Origin	England, Cambridge
Producer	Cambridge Distillery Cambridge
Contents	70 cl
Serving temperature	5 -10° C
Alcohol content	42 %
Article no	79401700

Comments

The world's first gin that focuses exclusively on Japanese botanicals. Our Master Distiller was delighted with these exciting and unusual flavors, only accessible through Cambridge Distillery's low-temperature distillation processes. It is made from six botanicals: juniper, shiso leaf, sesame, cucumber, sansho and yuzu: each is individually vacuum distilled and then blended together for exceptional purity of flavor.

Tasting notes

Fresh green aromas (shiso) and juniper aromas. Peppery, spicy and yuzu citrus notes.
